PROJECTS

AutoHunt Resell Market

[Live_Site](#) || [Client_Side](#) || [Server_Side](#)

Its a common marketplace where people can buy and sell secondhand cars easily.Its a fully developed website made with React,React query, Firebase,Tailwind,Express js, mongo DB, Node js

- Buyers can buy cars through payment also have purchased list to manage them.
- Sellers can sell, advertise and manage (delete , add) their cars inventory.
- Admin will have every access of buyers , seller account,reported items management,proper admin functionality.

Dentist Portal site

[Live_Site](#) || [Client_Side](#) || [Server_Side](#)

This is portal web application where user can book an appointment for any specific schedule and confirm it by payment.This website is build with React, tailwind, daisyUi,firebase,mongo db,express,Node js deployed in vercel.

- User can only book an appointment of a specific available once.Means he/she can not book other schedule on that treatment.
- Implemented authorization and token validation using JWT in thw whole website.
- Users can add booking to list and make payment to confirm the booking of the treatment.can have gmail confirmation.

Photographer Review Site

[Live_Site](#) || [Client_Side](#) || [Server_Side](#)

This is a simple website where users can give review and also edit and delete their review.This website is build react, firebse,node js,mongo db,express js.

- user can create a new account.I have implemented proper validation in the form.They can also register through google account.
- Private route is also implemented .Only registered user can add review and edit their review here.
